

TABLE OF CONTENTS

VOLUME 1: PHYSIOLOGICAL ECOLOGY

ABOUT THE AUTHOR

ABOUT THE BOOK

COPYRIGHT

1 INTRODUCTION

2 LIFE CYCLES AND MORPHOLOGY

2-1: Meet the Bryophytes

Definition of Bryophyte

Two Branches

Limited by Scale and No Lignin

Limited by Scale – Forced to Be Simple

Limited by Scale – Needing to Swim

Limited by Scale – And Housing an Embryo

Differences Within Bryobiotina

2-2: Life Cycles: Surviving Change

The General Bryobiotina Life Cycle

Dominant Generation

The Life Cycle

2-3: Marchantiophyta

Distinguishing Marchantiophyta

Class Marchantiopsida

Class Jungermanniopsida

2-4: Bryophyta – Takakiopsida

Phylum Bryophyta

Class Takakiopsida

2-5: Bryophyta – Sphagnopsida

Class Sphagnopsida – the peat mosses

Ambuchananiaceae

2-6: Bryophyta – Andreaeopsida, Andreaebryopsida, Polytrichopsida

Andreaeopsida – the granite mosses

Andreaebryopsida

Polytrichopsida

Polytrichaceae

Tetraphidaceae

Buxbaumiaceae – Bug on a Stick

Diphysciaceae

2-7: Bryophyta – Bryopsida

Bryopsida

2-8: Anthocerotophyta

Anthocerotophyta

3 SEXUAL STRATEGIES

Unisexual and Bisexual Taxa

Origin of Bisexuality in Bryophytes

From Whence the Variation?

Size and Sex Differences

Dwarf Males

Heterospory?

Maintaining Sexual Dimorphism in a Population

Reproductive Tradeoffs

Significance of a Dominant Haploid Cycle

4 ADAPTIVE STRATEGIES

- 4-1: Adaptive Strategies: Phenology, What does it mean?
 - Developing Consistency in Reporting
 - System of Naming
- 4-2: Adaptive Strategies: Phenology, It's All in the Timing
 - Timing the Stages – Environmental Cues
 - Patterns
 - Growth
 - Asexual Reproduction
 - Gametangia
 - Protandry and Protogyny
 - Habitat Differences for Gametangia
 - Desert
 - Aquatic
 - Sporophyte Maturation
 - Energy Needs
 - Optimizing Dispersal Time
 - Spring and Autumn Dispersal
 - Winter Dispersal
 - Elevation Effects
 - Spores and Protonemata
 - Duration of Stages
 - Gametangia
 - Sporophytes
 - Winter Effects
 - Geographical Differences within Species
- 4-3: Adaptive Strategies: Phenology, a *Sphagnum* Case Study
 - Sphagnum*: A Case Study
- 4-4: Adaptive Strategies: Phenology, Tradeoffs and Habitats
 - Tradeoffs
 - Tradeoffs with Spore Production
 - Geographic Differences
 - Seasonal Differences among Habitats
 - Tropics
 - Deserts and Dry Habitats
 - Disturbed Habitats – Ephemerals
 - Wetlands
 - Aquatic
 - Control of Phenological Events
- 4-5: Adaptive Strategies: Growth and Life Forms
 - Growth Forms and Life Forms
 - Definitions
 - Jargon of Life History
 - Growth Forms
 - Life Forms
 - Environmental Influences on Life Form
 - Physical Effects on Growth Form
 - Moss Balls
 - Adaptive Significance
 - Habitat Relationships
 - Deciduous Woodlands
 - Pine Woods
 - Epiphytes
 - Peatlands
 - Aquatic
 - Deserts
 - Polar Regions
 - Alpine
 - Studies Needed
- 4-6: Adaptive Strategies: Life Cycles
 - Life Strategies
 - Clonal Growth
 - Foraging and Sharing

- Implications for Reproduction
- Density Effects
- Tradeoffs
- r & K Strategies
 - Bet Hedgers
 - Dedifferentiation Issues
 - The r Strategist
 - The K Strategist
- Life Cycle Strategies
 - Diaspore Banks
 - Tradeoffs
 - Habitat Studies
- 4-7: Adaptive Strategies: Spore Dispersal**
 - Spores vs Vegetative Dispersal
 - Spore Dispersal Mechanisms
 - Wind dispersal
 - Animal Dispersal
 - Sticky spores
 - Water Dispersal
 - Long-Range Dispersal
 - Spore Size and Number
 - Distances
 - Gene Flow
 - Spore Survival and Longevity
 - Spore Establishment Success
- 4-8: Adaptive Strategies: Vegetative Dispersal**
 - Vegetative Reproduction
 - Fragmentation
 - Vegetative Diaspores
 - Animal Dispersal
 - Human Dispersal
 - Water Dispersal
 - Splash Cups
 - Gravity
 - Propagule Dispersal Distances
 - Propagule Survival
 - Effects of Grazing

5 ECOPHYSIOLOGY OF DEVELOPMENT

- 5-1: Ecophysiology of Development: Hormones**
 - Introduction
 - Developmental Adjustments
 - Life Cycle Importance
 - Growth Regulators
 - Auxins
 - Cytokinins
 - Gibberellins
 - Abscisic Acid
 - Lunularic acid
 - Ethylene
 - Acetylcholine
 - Cryptochromes
- 5-2: Ecophysiology of Development: Spore Germination**
 - Definition of Spore Germination
 - Germination Process
 - Water Needs
 - Energy Needs
 - Light Needs
 - Environmental Control over Germination
 - pH
 - Nutrients
 - Temperature
 - Vernalization

- Germination Inhibitors
- Hormonal Regulation
 - Inter- and Intraspecific Interactions
 - Interspecific Competition
- External Growth Promoters
- Pollutants
- Spore Size
 - Anisospory and False Anisospory
 - Tradeoffs
- Germination Success
- Spore Resiliency and Longevity
- Adaptations to Moisture Extremes
 - Dry Habitats
 - Aquatic
- 5-3: Ecophysiology of Development: Protonema**
 - The Protonema
 - Water Relations
 - Seasonal Light/Temperature Changes
 - Light Intensity
 - Light Quality
 - Photoperiod
 - Hormonal Response
 - Tropisms
 - Nutation
 - Interactions
 - Nutrients
 - Rhizoids
 - Tnema
- 5-4: Ecophysiology of Development: Gametophore Buds**
 - Establishment Success
 - Light
 - Growth Regulators
 - Interactions with Other Organisms
 - Nutrients or Inhibitors?
 - Temperature
- 5-5: Ecophysiology of Development: Gametophores**
 - Growth
 - Stem Growth
 - Water
 - Light
 - Tropisms
 - Photoperiod
 - Temperature
 - Growth Regulators
 - Branches and Apical Dominance
 - Environmental Factors
 - Growth regulators
 - Nutrients
 - Leaves
 - Light
 - Water
 - Nutrients
 - Growth Regulators
 - Rhizoids
 - Temperature
 - Light
 - Tropisms
 - Adhesion
 - Growth Regulators
 - Wounding
 - Habitat Conditions
 - Ecological Interaction
- 5-6: Ecophysiology of Development: Fragments**

- Fragmentation
 - Arctic and Alpine
 - Streams and other Aquatic Habitats
- Dedifferentiation
- Establishment
- Growth Regulators
- Animal Dispersal
- 5-7: Ecophysiology of Development: Brood Bodies**
 - Definitions
 - Brood Bodies
 - Tubers
 - Development
 - Hormonal Effects
 - Environmental Effects
 - Dormancy
 - Tradeoffs
 - Ecological Function
- 5-8: Ecophysiology of Development: Gametogenesis**
 - Definition
 - Water Availability
 - Photoperiod and Light Intensity
 - Nutrients
 - pH
 - Temperature
 - Hormones
 - Delay of Gametogenesis
 - Male vs. Female
 - Differential Survival
 - Bisexual Gametangial Differentiation
 - Hormonal Regulation of Gender
 - Dwarf Males
 - Different Controls
 - Numbers of Gametangia
 - Gender Recognition
 - Geographic and Habitat Relationships
 - Fertilization
 - Tradeoffs – Cost of Reproduction
- 5-9: Ecophysiology of Development: Sporophyte**
 - Sporophyte
 - Control of Generation
 - Seta Elongation
 - Energy Source
 - Light
 - Nutrients
 - Water Needs
 - Hormones
 - Capsule Shape
 - Neoteny
 - Spore Production
 - Dehiscence
 - Tradeoffs
 - Habitat Adaptations
 - Bryophyte Senescence

6 LIMITING FACTORS AND LIMITS OF TOLERANCE

- Pushing the Limits
- C-S-R Triangle
- Severe Stress
- Genetic Adaptations

7 WATER RELATIONS

- 7-1: Water Relations: Conducting Structures**
 - Bryophytes as Sponges

- Conducting Structure
- 7-2: Water Relations: Movement**
 - Water Movement
 - Ectohydric
 - Endohydric
 - Nocturnal
 - Mechanisms of Water Movement
 - Transport to Sporophyte
- 7-3: Water Relations: Plant Strategies**
 - Water Strategies
 - Thallose Liverworts
 - Structural Adaptations of Mosses and Leafy Liverworts
 - Rhizoids and Tomentum
 - Mucilage
 - Capillary Spaces
 - Stems and Branches
 - Central Strand
- 7-4: Water Relations: Leaf Strategies**
 - Overlapping Leaves
 - Concave Leaves
 - Lobules and Storage Organs
 - Alar Cells
 - Hair Points
 - Papillae
 - Costa
 - Plications
 - Lamellae
 - Thickened Leaf
 - Stereids
 - Cuticle
 - Cell Structure
 - Borders
 - Teniolae
 - Revolute and Involute Margins
 - Hyalocysts and Cancellinae
 - Vacuoles
- 7-5: Water Relations: Physiological Adaptations**
 - Physiological Adaptations
 - Drought Tolerance vs Avoidance
 - Desiccation Avoidance
 - Life Cycle and Life Strategy Adaptations
 - Seasonal Changes
 - Mode of Conduction
 - Osmotic Potential
 - Plasmolysis
 - Desiccation Tolerance
 - Seasonal Differences
 - Desiccation-induced Changes
 - Chloroplast Responses
 - Mitochondria
 - Nuclei
 - Vacuoles and Vesicles
 - Membranes
- 7-6: Water Relations: Rehydration and Repair**
 - Uniqueness of Bryophytes
 - Resumption of Activity
 - Protein Degradation
 - Photosynthesis
 - Membrane Repair
 - Photodamage
 - Architectural Changes
 - Chloroplast Recovery

Frequency of Dehydration/Rehydration
Implications

7-7: Water Relations: Biochemical Adaptations to Drying

Protection from Oxidation
ABA Role
Membrane Chemistry
Shoot Tips
The Genes

7-8: Water Relations: Habitats

Habitat Relations
Aquatic Habitats
Arid Habitats
Arctic
Forest Floor

8 NUTRIENTS

8-1: Nutrients: Requirements

What Do Bryophytes Require?
Nutrient Requirements
Nutrient Sources
Precipitation
Atmospheric Dust
Micronutrients
Litter and the Role of Trees
Soil
Snow
The Salmon Story
Seasonal Behavior

8-2: Nutrient Relations: CO₂

CO₂ Sources and Limitations

8-3: Nutrient Relations: Nitrogen

N Forms
Nitrate and Ammonium
Organic Nitrogen
Nitrogen Fixation
Peatland Associations
Liverwort Symbiosis
Hornwort Associations
Lunar Rocks

8-4: Nutrient Relations: Uptake

Uptake
Cation Exchange
Proton Pumps
Specificity
Seasons
Fungal Connections – Mycorrhizae?
Cryptothallus mirabilis
Other Underground Partnerships
Arbuscular Mycorrhizae
Beneficial or Harmful?

8-5: Nutrient Relations: Translocation and Transport

Translocation and Transport
Sucrose Transport
Leptome Transport
External Conduction
Sporophyte Conduction

8-6: Nutrient Relations: Deficiency

Nutrient-deficient Habitats
Nutrient Deficiency Symptoms
N and P Deficiency
K Deficiency
Ca Deficiency
Mg Deficiency

- S Deficiency
- Fe Deficiency
- Micronutrient Deficiency
- Oxygen Deficiency

- Community Effects of Deficiencies

8-7: Nutrient Relations: Fertilization

- Fertilization Effects

- N Additions
- P Additions
- Ca and Mg Additions
- Fe Additions
- CO₂ Additions

- Fertilization and Community Structure

8-8: Nutrient Relationships: Cycling

- Storage and Release

- Storage Locations

- Luxury Nutrients

- Bryophytes as Nutrient Sinks

- Release during Desiccation/Rehydration

- Bogs and Fens

- pH Effects

- Indicator Species

- Methodology Concerns

- The Vernal Dam

- Needed Research

9 LIGHT

9-1: Light: The Shade Plants

- Bryophytes Are Shade Plants

- Compensation Point

- Light Measurement

- Adaptations to Shade

- Compensation Points

9-2: Light: Adaptations for Shade

- Structural Adaptations for Light Capture

- Papillae

- Leaf Area Index

- Self-shading

- Growth and Branching

- Chlorophyll Fluorescence

- Morphological Responses

- Physiological Adaptations to Low Light

- Chlorophyll

- Other Pigments

- Chloroplast Movement

- Light and Storage

- Forest Gaps

- Sunflecks

- Litter Burial

- The Partnership Choice

9-3: Light: Effects of High Intensity

- Effects of High Light Intensity

- Adaptations to High Light

- Structural Adaptations

- Pigmentation

- Desiccation Effects and Light

- Avoidance – Hiding under Rocks

9-4: Light: Seasonal Effects

- Bryophyte View of Light

- High Light and Low Temperatures

- Light Effects on Reproduction

- Seasonal Effects on Pigments

- Colors of Light

- Photoperiod Effects

9-5: Light: Cave Mosses

Cave Mosses

Schistostega pennata – Luminous Moss*Cyathodium*

Wombat Holes

Cave Communities

Rockhouses

Responses to Low Light in Caves

10 TEMPERATURE – coming soon**10-1: Temperature: Effects**

Temperature

Bryophyte Alteration of Temperature

Soil Temperatures

Degree Days

Safe Sites

Life Cycle Effects

Normal and Extremes for Growth

Compensation Point

Antarctic and Arctic

Acclimation

Cold vs Heat

Acclimation Triggers

10-2: Temperature: Cold

Low Temperature Limits

Overwintering under Snow

Snow Temperatures

Nutrients from Snow

Epiphytes

Light through Snow

Late Snow Beds

Freezing

Desiccation Tolerance

Protection of Photosynthetic System from Light

Role of Calcium

Abscisic Acid

Transporter Proteins, ABA, and CA

Freezing Effects

Supercooling Intracellular Water

Ice Crystals Increase Solutes

Crystal Damage

Preventing Ice Crystals

Rate of Freezing

Hydration State

Lipids in Membranes & Protein Denaturation

Unsaturated Lipids

Fatty Acid Alteration

Fatty Acids

Fatty Acids & N

Triglycerides

Polyribosomes

Age Difference to Freezing

Freezing Effect on Distribution

Regulation of Mammal Reproduction?

The Vernal Dam

10-3: Temperature: Heat

Heat Stress and Heat Resistance

Heated Habitats

Plant and Cellular Responses

Biochemical Responses

Isoprene

Sugars

Peroxidase

Heat Shock Proteins

- Photosynthetic Apparatus
- Acclimation
- Night Temperature
- Hydration State
- Duration
- Age and Structure
- Reversible Effects
- Decomposition

10-4: Temperature: Species and Ecosystems

- Species and Distributions
 - Importance of Climate
 - Warming Studies
 - Seasonal Fluctuations
 - Species Differences
 - Cryptic Species
- Ecosystem Relationships
 - Altering Ecosystems
 - Disturbed Habitats
 - Grassland
 - Tropics
 - Polar and Alpine
 - Lakes
 - Streams
 - Peatlands

11 PHOTOSYNTHESIS – coming soon; SUBCHAPTER NAMES MAY CHANGE OR BE RE-ORDERED

11-1: Photosynthesis: Process

- What Is Productivity?
- Early Studies
- Structural Adaptations
- Physical Adaptations
- Photosynthetic apparatus – the Chloroplast
 - Chloroplast Structure
 - Chloroplast Replication
 - Photosynthetic Capacity
 - Antenna Pigments
- Photoinhibition
 - Quenching
- Sun and Shade Plants
 - Chlorophyll Concentration
 - Chlorophyll *a:b* Ratio
 - Seasonal Differences
 - Desert and Dry Areas
 - Antarctic
- Age Differences
- Type of Photosynthetic Pathway
 - C₃ Evidence
 - CO₂-Concentrating Mechanisms – Exceptions to C₃?
 - Bicarbonate Uptake
 - Pyrenoids
 - The Bottom Line
- Diurnal Patterns in Photosynthesis?
- Products of CO₂
- Dark CO₂ Fixation
- Transport of Photosynthate
- Storage of Photosynthate
- Respiration
- Sporophyte Photosynthesis

11-2: Photosynthesis: Limiting Factors

- Limiting Factors
- Compensation Point
- Water Availability
 - Water Excess

- Seasonal Water Differences
- Nighttime Absorption
- CO₂
 - CO₂ Environment
 - Limits to Entry
 - Compensation Point
 - Methane
- pH
- Light
 - Compensation and Saturation Points
 - Excess Light
 - Continuous Light
- Temperature
- Acclimation
- Aquatic Differences

11-3: Productivity

- Types of Productivity
- Ecological Factors
- Growth
 - Growth Measurements
 - Annual Length Increase
- Sporophyte Productivity
- Productivity and Aging
- Life Span
- Leaf Production and LAI
- Energy Content
- Fungal Partners
- Mitotic Activity
 - Seasonal Differences
- Rates of Productivity
- Latitude Differences
- Habitat and Geographic Comparisons

12 DECOMPOSITION – coming soon

VOLUME 2: GENERAL ECOLOGY

(Coming much later)

SCALE AND PATTERN – coming soon

NICHE

METAPOPOPULATIONS

INTERACTIONS

COMPETITION

ANTIHERBIVORY – coming soon

BRYOGEOGRAPHY

VOLUME 3: HABITATS AND ROLES

(coming haphazardly)

ROLE

FOREST

SEEDLINGS

ANIMALS

HABITATS

EPIPHYTES

TROPICS

GEOHERMAL – coming soon

AQUATIC

Streams

Lakes

PEATLANDS

DISTURBED HABITATS

FIRE

BOREAL

ARCTIC

DUNG

VOLUME 4: POLLUTION

(coming later)

POLLUTION

AQUATIC POLLUTION

VOLUME 5: USES

(coming in parts)

GENERAL USES – coming soon

MEDICAL USES – coming soon

HARVESTING AND CONSERVATION – coming later

MOSS GARDENS – coming soon

GLOSSARY

(constantly growing)
